Monday 24 & Tuesday 25 October 2016
9.00 am - 5.00 pm

Price

\$550 Early Bird Rate (if paid by 31 August)
\$695 standard rate

Our daily lives are full of close encounters with the plant kingdom - including food, textiles, medicines, drugs, dyes, pesticides and perfumes. In this two-day course you will learn about the fascinating world of what is in fact the human side of plant-animal interactions.

Professor Mabberley returns to Adelaide to deliver his third lecture series. Don't miss out on this opportunity to learn from one of the world's great botanical minds.

This course is not only for botanists and ethnobotanists, but for all those interested in the biological basis of human society. The course will teach a far deeper understanding of plants; how they have shaped our past and how they can impact our future.

Professor David Mabberley, formerly Director of the Herbarium, Library, Art and Archives, Royal Botanic Gardens Kew and Executive Director of the Royal Botanic Gardens & Domain Trust in Sydney.

With degrees from both Oxford and Cambridge and 20 years as a Tutorial Fellow of Wadham College, Oxford, David Mabberley has had a distinguished botanical career in academia and is recognised as an eminent botanist, historian and authority on botanical art. Currently, he is an Emeritus Fellow, Wadham College, University of Oxford, and Extraordinary Professor at the University of Leiden, The Netherlands.

David Mabberley is a prolific author with almost 300 publications including 17 books. The indispensable *Mabberley's Plant-Book* is a classic botanical reference which gives an overview of the world's flora and is currently in its third edition.
