A study of practical ecological biochemistry for humans

Presented by **Professor David Mabberley**
27-28 October 2014

Course details

Course name

Economic Botany Today:
A study of practical, ecological
biochemistry for humans

Location

Noel Lothian Hall
Adelaide Botanic Garden
(see map on reverse)

Dates & times

Monday 27 & Tuesday 28 October 2014
9.00 am - 5.00 pm

Price

\$695 Early Bird Rate (if paid by 31 August)
\$795 standard rate

Our daily lives are full of close encounters with the plant kingdom - including food, textiles, medicines, drugs, dyes, pesticides and perfumes. In this two-day course you will learn about the fascinating world of what is in fact the human side of plant-animal interactions.

Don't miss out on an opportunity to learn from one of the world's greatest living botanists, David Mabberley.

This course is not only for botanists and ethnobotanists, but for all those interested in the biological basis of human society. The course will teach a far deeper understanding of plants; how they have shaped our past and how they can impact our future.
