FLORA OF SOUTH AUSTRALIA FAMILY LIST

South Australia is home to over 4800 taxa of vascular plants in 166 plant families. In this list, **bold** indicates that a plant family has been published, this is followed by the version number and the year of publication. The family sequence largely follows *Mabberley's Plant Book* (2009) and the *Australian Plant Census* (www.anbg.gov.au/chah/api). An asterisk indicates that only part of a family is available. All treatments have undergone an extensive reviewing and editing process.
