

# Visiting the Adelaide Botanic Garden

We are going to visit the  
**Adelaide Botanic Garden**

We can also call it the  
**Botanic Garden**

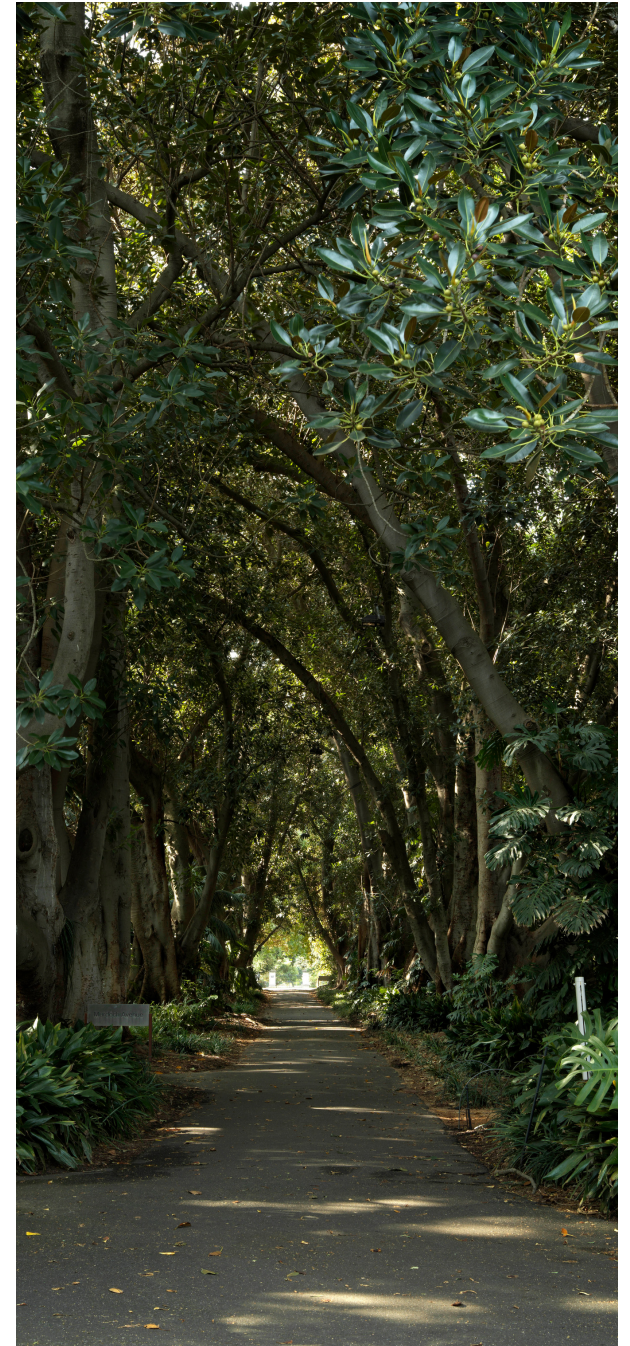

The **Botanic Garden** is a  
big garden in Adelaide  
that has lots of plants  
from all over the world

# During your visit...

You will help us protect the Gardens with all its special and rare plants

You can eat your food here, but please don't eat any of the plants unless your Botanical Educator says it is okay!

# During your visit...

You will stay on the pathways so we don't damage any plants

You can ask lots of questions

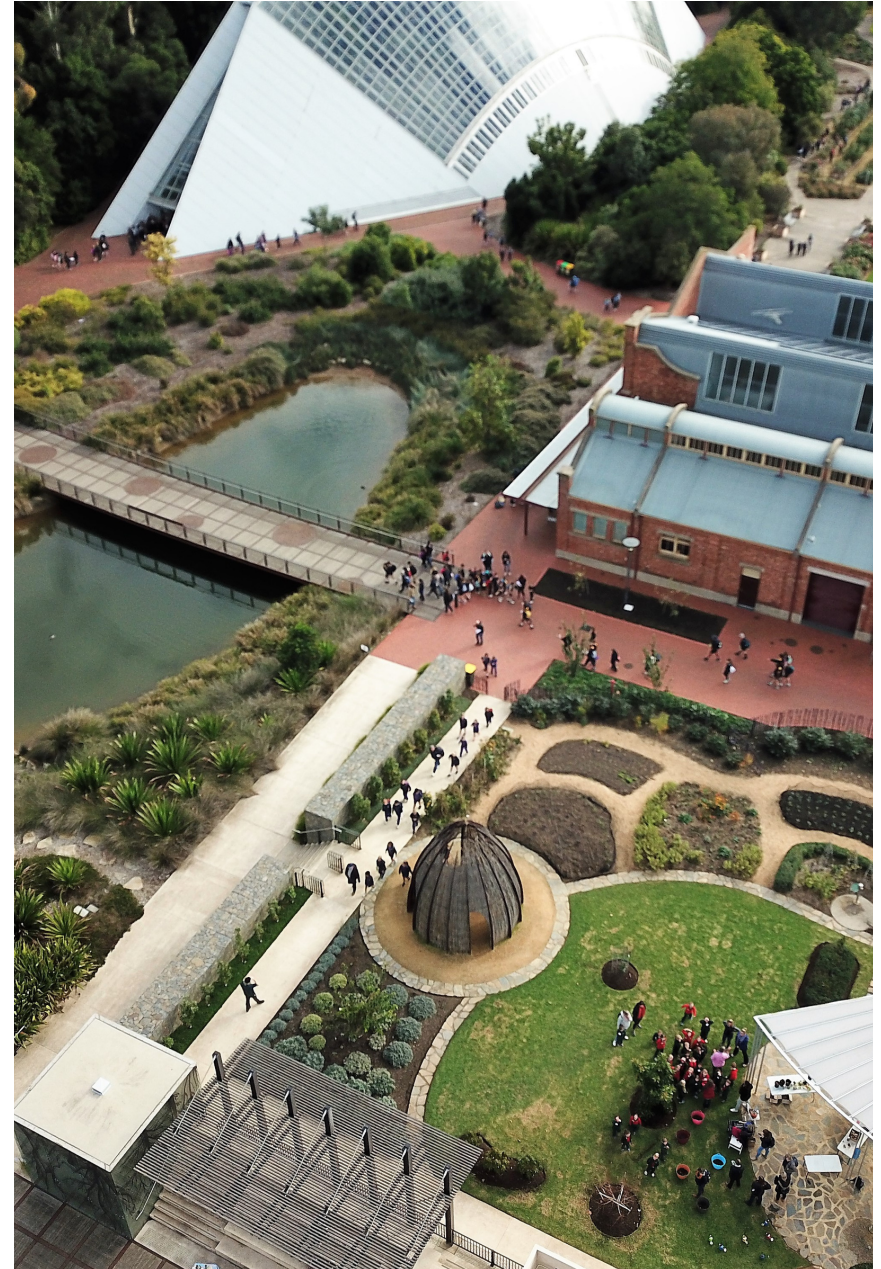

You can gently touch when your Botanical Educator says it's okay

Lots of people visit and work at the Botanic Garden so you will see people that you don't know

It is important to stay with your teacher or adult

You might see people driving Gators, which can be a bit loud

If you hear one coming, step to the side to let them through, and give a big wave!

You might hear some other loud noises around the Garden like lawn mowers or leaf blowers

This is called the **Friends Gate**

It is one of many gates that let people into the **Botanic Garden**

You will be able to find a paper map here that can help you find your way around the **Botanic Garden**

You might have travelled a long way to get to the **Botanic Garden**

There is a toilet very close by and a place to fill up your drink bottle if you need water

This is called the **Hackney Gate**

It is one of many gates that let people into the **Botanic Garden**

There is a nice lawn to sit on and have a snack and a drink

There are toilets and water close by

This is a quiet and shady place  
to have a snack and a drink

There is a toilet close by

This area is called the **Schomburgk Pavillion** and is a covered and shady place with a cafe

There is a toilet close by

**The Museum of Economic Botany** helps us learn how plants have been used by people across history

It is a quiet place with lots of things to look at

This is the **Bicentennial Conservatory**. We can call it the **Bicon**. It creates an environment similar to a rainforest

You can walk on a path on the ground or on a bridge

It can get very hot and humid on hot days

It rains in the **Bicon** just like a real rainforest

There are sprinklers on the walls that turn on when the temperature gets warm enough outside

The **Amazon Waterlily Pavilion** has plants from hot and humid climates

It can get very hot and humid on warm days

If you are very quiet, you might see some of the small fish that live in the pond

The **Palm House** is a big glasshouse that has plants from the island of Madagascar

Outside, there are lots of cacti which are very sharp, so be careful going near them!

We are going to learn, explore and have fun at **Adelaide Botanic Garden and State Herbarium!**

If you have any questions about your visit, please email us at [DEWBGSchools@sa.gov.au](mailto:DEWBGSchools@sa.gov.au)
