Hello. We fully support the listing of the Neighbour family house designed by the preeminent local architect for his own family to dwell in.

It's a terrific example for its contribution to preserving post-war modernistic building techniques.

This house really does visibly demonstrate the liveable new building initiatives and ideas of that post world war II period of our home building industry in SA.

To keep this house would certainly do justice to that era of local home construction and to honour such a talented architect
