

Wildlife management and control plan

Please complete this plan with your approach to managing and controlling species and/or species groups. If you propose to undertake a different management method for a particular species, please outline this in a separate line.

Species/species group Examples of groups include lizards, venomous snakes, small mammals, bird eggs & chicks.	Home range Will the animals be moved within their assumed home range?		Release location How far will you move the animals from the location of capture?	Minimising impact at release location If applicable, describe how you will minimise the impact of release to the animals?	Methods Please describe the techniques that will be used to interact with wildlife including capture method, handling and transporting.	Equipment Please describe the equipment and PPE that will be used to interact with wildlife, including dimensions of traps/transport carriers.
