### PARROT QUIZ

Match the picture to the name:

A.

B.

C.

D.

E.

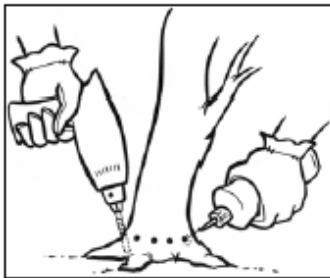

F.

1. Adelaide Rosella 2. Eastern Rosella 3. Purple-crowned Lorikeet 4. Rainbow Lorikeet 5. Red-rumped Parrot 6. Regent Parrot

Answers A=2, B=5, C=3, D=6, E=1, F=4.

### Advantages of the Drill and Fill method

"Drill and Fill" is one of the most efficient ways to kill larger weeds and is now recognised as the best way to kill olives. This is because the herbicide is translocated up into the plant foliage as well as back down into the root system. This is the way Glyphosate is designed to work.

## Caring for private bushland?

Our group could be for you

## Friends of Private Bushland

is a group for everyone who has an interest in preserving our state's precious remaining bushland.

This may include:

- people who have some Heritage Agreement bush on their land, or
- people who own a Sanctuary or Wildlife Refuge, or
- people who own or look after an area of bush on private land, or
- anyone with an interest in preserving bushland

**Friends of Private Bushland could help you to look after your bush better, and help make your hard work more effective.**

*Friends of Private Bushland operates through the volunteer efforts of its members. It is affiliated with Friends of Parks Inc. (Dept. of Environment, Water and Natural Resources).*

We aim to help preserve our bush heritage in practical ways by providing information, education, support, sharing ideas, friendship and links to like-minded people.

What we do:

- hold regular field trips to bush properties and other places of interest to see how others deal with bush care problems such as weeds, revegetation and feral animals.
- organise regular speakers on topics of interest
- produce an informative and educational quarterly newsletter, with regular columns on topics such as practicalities, bird ID and weed ID and eradication, plus articles from members sharing their experiences, successes and problems.
- membership is just \$10 per year for email copies of the newsletter, \$15 if posted.

**Learning from each other's experiences**

**Trying out tree guard ideas**

**Propagation workshop**

**Plant identification**
