The projected flow inundation areas displayed are indicative only and subject to change. They should be used as a guide only.

The data contained in this map was produced in 2014 and does not necessarily take into account current levee bank condition.

The data contained in this map has been modelled to an accuracy sufficient only for broad scale flood risk management and planning.

Flood assessment for particular sites along the watercourses will require more detailed interpretation, survey and hydraulic analysis by appropriately experienced personnel.
