Banksias and bilbies: seasons of Australia [Book]

1995, Gould League of Victoria Inc.

An indispensable guide for the backyard naturalist, traveller, tourist, or person on the land. Banksias and Bilbies provides unique week-by-week information for the natural history enthusiast, or those of us who simply have an interest in the animals and plants around us.

Everyday learning about making the most of your environment [Book]

2011, Early Childhood Australia

Environments that support children's early learning are ones that are rich in relationships, rich in conversations, sensitive to each child's individual strengths and needs, give children opportunities to explore, practise skills and take risks and engage in 'big' ideas, such as environmental sustainability. This book provides helpful advice and practical ideas for educators, families and children.

Food Webs Kit [Education Kit]

1999, Gould League

An activity-based curriculum guide for primary classes to achieve many learning outcomes by exploring food webs from Africa, Australia and Antarctica. Explore food chains, food webs, basic ecology, classification, sorting, similarities and differences, adaptations and endangered animals. Includes sets of magnet backed graphics for food webs of Antarctica, Australia and Africa.

Forestry matters! A Forest Education Resource (copy 1) [Book]

2008, Primary Industries and Resources SA

The aim of this resource is to provide teachers with relevant, up-to-date and accurate information about forests. Although there are references to forests and forest animals from around the world there is a specific and deliberate focus on South Australia's forests. This resource includes lesson activity ideas, lesson plans, student worksheets, extension ideas and forestry fun pages, as well as a comprehensive list of resources that will provide useful additional information on the topic of forestry.

Environment

Forests: A Global Perspective [Book]

2011, Australian Teachers' Association of Victoria

Examine forest distribution and changes over time, environmental health, and understand their use by people. Investigate forest decline and its impacts, as well as strategies for managing resources to reduce poverty and promote conservation efforts for the future of forests.

George saves the world by lunchtime [Book]

2006, Eden Project

A perfect introduction for children to the green message of recycling, reusing, reducing, and repairing. George is determined to save the world by lunchtime but isn't sure how. Grandpa suggests starting with recycling his yogurt pot, composting the banana peel, and hanging the laundry to dry. Their bike trip to the recycling bank, charity shop, and local farmers' market illustrates how reusing materials and choosing local produce can make a big difference. George even manages to get his favorite toy fixed!

On Borrowed Time: Australia's environmental crisis and what we must do about it [Book]

2007, Penguin Books

There is no doubt that Australia's environmental problems appear huge and overwhelming. Not only is our unique natural heritage under threat but the consequences for agriculture, tourism and the economy may be catastrophic. Can anything be done to halt the destruction? In this powerful and passionate book, On Borrowed Time, David Lindenmayer argues that Australia does have the knowledge and resources to tackle our environmental problems. In addition, he outlines creative and impressive solutions we can all be a part of. As one of Australia's leading ecologists, Professor Lindenmayer delivers a timely message about the scale and urgency of the crisis we face.

Outdoor environmental games: survival special [Book]

1998, Gould League of Victoria

Outdoor Environmental Games offers a wide range of engaging outdoor activities that blend problem-solving with free play, allowing children to connect with the environment through fun experiences. These games encourage children to develop their feelings and attitudes toward nature while recognising their ability to make a difference. What a fantastic way to learn!

Environment

The revenge of Gaia [Book]

2006, Penguin

Lovelock's unique authority and original perspective sets this book apart from other books on environmental change. He speaks as a planetary physician with more than forty years experience of thinking about how to respond to the earth's needs as a living organism. Illustrated with examples drawn from his experiences around the world, Lovelock draws many radical conclusions, most controversially a passionate advocacy of nuclear energy. This, he argues, is not only a secure, safe and reliable source of energy, but also the only way to counter the lethal heat waves and rising sea levels that will increasingly threaten civilizations. Lovelock argues that the only way for humankind to come to terms with Gaia now, and have a chance of surviving, is to embrace science and technology, not reject them. This is his passionate manifesto of how to do that and so lessen our impact on the Earth before it is too late.

The world that we want [Book]

2004, University of Queensland Press

Nine different habitats and forty-five fascinating creatures feature in this spectacular portrayal of the rare and fragile beauty of North Queensland. Search through the ecosystems, discover the unique creatures and find out how these environmental worlds interact. Award-winning author and illustrator Kim Michelle Toft has created another stunning interactive environmental picture book, each illustration vividly hand-painted on silk.

Uno's Garden [Book]

2006, Puffin

When Uno arrives in the forest one beautiful day, there are many fascinating and extraordinary animals there to greet him. And one entirely unexceptional Snortlepig. Uno loves the forest so much, he decides to live there. But in time, a little village grows up around his house. Then a town, then a city...and soon Uno realises that the animals and plants have begun to disappear...From the creator of the international bestsellers Animalia, The Waterhole and Jungle Drums, here is an illuminating blend of storybook, puzzle book and numbers book - a moving and timely tale about how we all unknowingly affect the environment around us, just by being there, and how we can always learn from our mistakes and find ways of doing things better.

Where does the garbage go? [Book]

1994, Harper Collins Publishers

Follow that garbage truck...to the landfill to see how trash keeps piling up...to the incinerator to see how trash can be turned into energy...to the recycling center to see how a soda bottle can be turned into a flowerpot. Filled with graphs, charts, and diagrams, Where does the Garbage go? explains how we deal with the problem of too much trash and provides ideas for easy ways to be part of the solution.

Environment

Window [Book]

2002, Walker Books

Illustrated with elaborate and gorgeous collage constructions, Window is a wordless picture book that speaks volumes. It begins with a mother and baby looking through a window at a view of wilderness and sky as far as the eye can see. With each page, the boy grows and the scene changes, from forest, to a single house, to a village and then to a city.

World-wide Waste...its not a load of rubbish [Book]

2006, Planet Kidz

Is our future being wasted? Pollution is accelerating, climate change is threatening and we live in a world where we want everything... now. What is all this doing to our planet? The answer could be the greatest challenge of our time. Meet the gang who've dug deep and are ready to come clean with the biggest scoop of the century. World-wide Waste invites audiences to look at the huge waste issues around this planet and to become an Environmental Hero, intent on finding solutions. Blending fascinating factoids, wicked humour and bright illustrations, this book is both educational and fun.
