Water Treatment

Adelaide: Water of a City [Book]

2010, Barbara Hardy Centre for Sustainable Urban Environments/UniSA

This book, written by over 130 South Australian experts on water, describes the breathtakingly broad array of roles water plays in the functioning of a large community. It describes the nature of the city as a catchment, the history of water usage and management, and the issues, problems and pitfalls we face in developing sustainable water management practices.

All's Well?; Exploring the world of water with upper primary students (copy 1) [Book]

2012, One World Centre

A resource book for upper primary teachers - packed with lesson ideas and resources to bring the world of water to the classroom. All's Well? helps students become aware of the tough challenges the human community faces regarding water, as well as looking at possibilities for hope and change. This book gives teachers the tools to bring rich global learning experiences to the classroom - increasing knowledge, fostering new skills, questioning values, and encouraging realistic action for positive global citizenship.

Captain Plop and the Tour de Recycle [Book]

2009, SA Water

Dust off your pushbikes and don your purple lycra for a water recycling adventure like no other! Join Captain Plop as he races through three stages of water use and treatment - from the home, to the treatment plant and back to the house and garden for reuse. This book uses a bicycle race theme to introduce primary students to the concept of treating wastewater for the purpose of reuse.

Captain Plop the desalination adventure [Book]

2009, National Library of Australia

Ahoy me hearties! Come aboard for more swashbuckling Captain Plop adventures as he journeys through a desalination plant. From the intake pipe in the ocean to your tap at home, learn how Captain Plop transforms from salt water to drinking water. This book assist young children to grasp the complex process of desalination by providing simplified explanations in the context of a fun, pirate themed story.

Water Treatment

Water South Australia: a history of the Engineering and Water Supply Department [Book]

1986, The Government of South Australia

South Australia presented many challenges to the European settlers of the 1830s but few were more vital or formidable than that of seeking and maintaining a supply of fresh water. The provision of public water and sewerage services in South Australia has been a triumph of adaptation and experimentation in the face of disease, bureaucratic obstructions, engineering trial and error, and changing public attitudes. This absorbing book records the 150 years of history that underlie the Engineering and Water Supply Department of South Australia. The highly readable text combines with nearly a hundred photographs to show the places and personalities that have brought the Department to its present eminent position in this State."
