

Revegetation Information

How to find the Pre-European plant species list for your area to use in your revegetation project.

This is a two-step process using the online NatureMaps tool to identify the vegetation group areas on your property, which are identified by a specific code; and then using that code to find the Pre-European plant lists for your property.

NatureMaps is an initiative of the Department for Environment and Water that provides a common access point to maps and geographic information about South Australia's natural resources, through the exploration of maps and geographic features in an interactive online mapping format.

STEP 1. Open NatureMaps with the link below.

<https://data.environment.sa.gov.au/NatureMaps>

1. Click '**Start using NatureMaps**'
2. Zoom in to your property location.
3. Click on the '**Topo**' icon (bottom LHS of map) to change the view to **Street Map** or **Imagery**.
4. Click '**Switch to Layer View**' on left side of screen.
 - a. Tick the '**Vegetation**' box and expand this by selecting the '+' symbol next to this.
 - b. Scroll down and tick '**Pre European Vegetation**' box.
5. Click on your property/site location on the map – this will bring up a '**General Description**'
 - a. Click on '**View Additional Details**' – This will display a code in the Details under the '**First Dominant Vegetation Group**' heading on the left side of screen.
 - b. Write down this code.
6. Repeat step 5 for additional vegetation zones within your property if required.

STEP 2. To find the list of Pre-European Vegetation click on the link below.

<https://www.landscape.sa.gov.au/hf/nativeplants>

Scroll down to the "**Southern Mount Lofty Ranges species master list**" and look for the **code** you identified in Step 1. Generally the "**Short list**" contains plants that should be available for commercial purchase.

You can download the list or lists and save this information.

STEP 3. (Optional) If you would like more information on specific species, the link below has additional details and photos of many native species.
