

Amendments to the Lower Limestone Coast WAP June 2019

Below are amendments that have been accepted by the Minister.

A certificate of amendment is also available.

Amendments made by the South East Natural Resources Management Board (SE NRM Board) The SE NRM Board made a number of amendments to the Plan on 29 June 2019 under section 89(2)(a)(i) of the Natural Resources Management Act 2004, to correct errors in the Plan or to make a change of form (not involving a change of substance) in the Plan, as follows:

| Page of Plan as adopted on 26/11/13 and amended 20 November 2015 | Reads | Amended to |
|--|--|---|
| <p>Page 115, Principle 135</p> <p>Does not include all relevant management areas in the description.</p> | <p>Notwithstanding principles 127-131, if a risk assessment process which is re-run prior to 1 July 2019, determines that the Coles, Frances, Hynam East, Zone 2A, and/or Zone 5A management areas are identified as a low to moderate risk of degradation, reductions may be discontinued and the TML set at the volume of water (holding) allocations and the tradeable components and/or specialised production requirements of water (taking) allocations, and allocations attached to forest water licences, plus the allowance for stock and domestic use and farm forestry, calculated at 30 June 2020.</p> | <p>Notwithstanding principles 127-131, if a risk assessment process which is re-run prior to 1 July 2019, determines that the Coles, Short, Frances, Hynam East, Zone 2A, Zone 3A and/or Zone 5A management areas are identified as a low to moderate risk of degradation, reductions may be discontinued and the TML set at the volume of water (holding) allocations and the tradeable components and/or specialised production requirements of water (taking) allocations, and allocations attached to forest water licences, plus the allowance for stock and domestic use and farm forestry, calculated at 30 June 2020.</p> |
