

Make Your Own Soil

Equipment

- Variety of soil samples
- Cover to protect desk

1. Use your soil samples to make a new soil – you might get 2 spoonfuls from one sample, 1 spoonful from another, etc.
2. Do a soil texture test to work out what type of soil you have made.
3. Give your soil type a name.
4. Describe your new soil.
5. Based on the properties of your soil explain what it could be used for.
