

# Free Samphire identification workshops

## What's it all about?

This is a hands on workshop designed to learn more about Samphire plants and their special place in the landscape. Hand lenses and dissecting scopes will be used to closely examine plant structure and to assist with telling each plant apart.

This workshop will help gain confidence in identifying Samphire plants in the field.

## Who should attend?

Experts and practitioners who work in a coastal management role and community groups, students and other individuals who wish to learn more and / or actively manage and care for our coasts.

## Presenter: Peri Coleman

Owner and operator of Delta Environmental Consulting Peri Coleman has 40 years' experience in salt marsh, salt lake and salt field ecology. Peri is also part of the International Society for Salt Lake Research and studies lakes all over the world.

Other work includes water sampling in estuaries, flora surveys in salt marshes and macro invertebrate studies.

## Additional info / RSVP:

This is a free workshop with light refreshments provided.

Please RSVP with workshop preference to Fabienne Dee, Team Leader Community [Fabienne.Dee@sa.gov.au](mailto:Fabienne.Dee@sa.gov.au) 0428429321.

**Get in quick spaces are limited!**
