Applicant/ Project Name	Total	Organisation	Council	Landscape Priorities
Worlds End Conservation Pty Ltd *Engaging community members and Worlds End Conservation members in environmental education and citizen science*	$10,000	NGO	Regional Council of Goyder	• Communities • Biodiversity • Pest plant/animal
Worlds End Conservation (WEC) engages experts in various environmental fields to provide educational opportunities to WEC members and the wider community in environmental education and citizen science in Bird Banding, Bush Tucker workshops and field activities.				
Stansbury Progress Association Inc *Oyster Point Drive Coastal Conservation Project*	$4,100	Community Group	Yorke Peninsula Council	• Communities • Biodiversity • Pest plant/animal
The removal of high priority weeds along the section of coast directly in front of the Oyster Point Drive Caravan Park and revegetation of native species.				
Tarcowie Landcare Group Inc. *2023 Biolink Project*	$5,819	Landcare	District Council of Orroroo Carrieton	• Communities • Biodiversity
Generational land clearance has substantially modified the local landscape in Tarcowie. Re-establishing and creating corridors, linkages and connectivity to creek lines and remnant vegetation and controlling creekline erosion are the main aims of the project.				
Riesling Trail Management Committee *Completion of feral olive removal along Riesling Trail to Watervale Station area*	$8,500	Community Group	Clare & Gilbert Valleys Council	• Communities • Biodiversity • Pest plant/animal
This funding request is primarily to pay for contractors to remove olives adjacent to the Riesling Trail - Watervale Station. Tubestock for revegetation. Collaborative project working alongside Council and private landholders.				
Gawler River Riparian Restoration *Gawler River: Environmental restoration of the north bank and Buchfelde floodway*	$10,000	Community Group	Light Regional Council Town of Gawler	• Communities • Biodiversity • Water • Pest plant/animal • Sustainable Agriculture
Increase biodiversity along the Gawler River through revegetation, habitat-building and erosion control in a precinct of the Gawler River and with potential to become a remarkable biodiversity park. Contractor to conduct weed control, community and volunteers to plant tubestock, guards, mulch mats.				

Snowtown Community Management Committee Inc *The Meeting Place Project*	$9,756	Community Group	Wakefield Regional Council	• Communities • Biodiversity • Sustainable Agriculture
A revegetation program that includes, direct seeding local native perennial grasses and herbs and planting tube stock. Also aims is to find out what plants are now extinct in our region and try to bring back these plants. An example of this is *Maireana sedifolia* or Pearl Bluebush that now only exists along a few roadsides.				
Kadina Memorial School *Nharangga Bush Tucker Community Garden*	$8,000	First Nations School	Copper Coast Council	• Communities • Biodiversity • Sustainable Agriculture • Pest plant/animal
To establish an Indigenous Bush Tucker Garden where students and community members will learn about the region's First Nation's heritage and culture through the natural world. This will provide a tangible hands-on experience to learn about sustainability, soil science, a plant's food and medicinal properties, as well as the scientific name of species. It also fosters the school's Reconciliation Action Plan (RAP).				
Tickera Community & Recreation Association Inc *A Timely Tickera Tidy Up*	$5,425	Community Group	Barunga West Council	• Communities • Biodiversity • Sus Agriculture • Water
Tickera town has seen a decline in natural habitat and an escalation of declared weeds and garden escapes. This project will include weed control and tubestock planting.				
Bundaleer Forest Community Areas Association Incorporated *Bundaleer Creek Rehabilitation Stage 4 (Final)*	$10,000	Community Group	Northern Area's Council	• Communities • Biodiversity • Water Management • Pest Plant and Animal Control
The project will enhance the natural environment of the Bundaleer Creek by removing invasive plant species and replacing with locally appropriate native species. It will improve water quality and provide habitat for native species in line with Broughton Catchment River Management Plan and NYLB Plan priorities.				

Barunga West Council *Willamulka Corridor Project*	$10,000	Council	Barunga West Council	• Communities • Biodiversity • Pest plant/animal
The Willamulka road and rail corridor is one of the few remaining landscape-scale vegetated corridors on northern Yorke Peninsula, providing an important remnant of relatively healthy vegetation stretching 28km between the towns of Bute and Kadina. This project includes the development of a management plan for the corridor by Greening Australia, who will undertake a vegetation survey and compile a species list and recommended actions.				
Robert Paterson and other landowners *Restoration and preservation of Wauraltee Beach Sand Dunes*	$4,850	Landholder	Yorke Peninsula Council	• Communities • Biodiversity
Regeneration of the coastal dunes using coir rolls, signage to educate about erosion and protection. Restrict or eliminate inappropriate vehicle use in sensitive primary dune areas to allow regeneration. Improve the likelihood of breeding pairs of endangered Hooded Plovers succeeding by keeping vehicles out of their breeding zones.				
Grain Producers SA *Sustain Grain Northern and Yorke*	$9,832	Community Group	Barunga West Council Clare & Gilbert Valleys Council	• Communities • Biodiversity • Sustainable Agriculture
GPSA will host a series of sustainability workshops and crop walks focused on soil health and carbon to grain growers and mixed farmers in the Northern and Yorke region. It will provide farmers with skills and information in soil data management and interpretation, look closely at soil health, opportunities in carbon sequestration and ways to reduce greenhouse emissions. Will produce a video.				
Yorke Peninsula Council *Minlagawi Gum Flat - Implementation of Management Plan*	$10,000	Council	Yorke Peninsula Council	• Communities • Biodiversity • Pest plant/animal
Contractor weed control and Narungga cultural day. Working together with Narungga to protect, restore and enhance the natural, cultural, and recreational values of Minlagawi Gum Flat Reserve while encouraging sustainable community use and learning opportunities.				

Yacka Moorundie Range Landcare Group Incorporated *Remnant vegetation patches are important to maintain ecosystem functions on farm*	$9,570	Community Group	Northern Areas Council	• Biodiversity • Sustainable Agriculture
Invertebrate surveys of rocky patches and field info session. The conservation of remnant patches in productive landscapes in necessary to maintain ecosystem services. The project will monitor invertebrates in several rocky outcrops where remnant vegetation patches occur and compare with recently cleared outcrops. This baseline data will add to existing vegetation data, but most importantly will provide knowledge on what is already in paddocks providing pollination and pest suppression.				
Gawler Regional Natural Resource Centre trading as Gawler Environment Centre *Connecting Communities with First Nations Knowledge of Biodiversity*	$9,460	Environment Centre	Town of Gawler	• Communities • Biodiversity • Pest plant/animal • Water
In 2022-2023 GEC plans to present a series of workshops exploring First Nations knowledge of biodiversity. There is growing interest in Indigenous knowledge of Country in the Gawler region; local landholders have expressed interest in learning about cultural burning, and Indigenous knowledge about native plants and foods. Four First Nations workshops - Language, Plants, Weaving, Cultural Burning.				
Dhibara Sanctuary Ltd *Cultural burning trials within Dhibara Sanctuary revegetation*	$9,352	NGO	Yorke Peninsula Council	• Communities • Biodiversity • Pest plant/animal
Cultural burn with monitoring. Dhibara Sanctuary will undertake small scale, low intensity cultural burning trials within their extensive revegetation sites, near Cape Elizabeth on Yorke Peninsula, with a monitoring program to enable the collection of data, that will help develop guidelines for cultural burning in the future.				
Upper Wakefield Landcare *Wakefield River and riverbank restoration in the Auburn township - Stage 2*	$10,000	Community Group	Clare & Gilbert Valleys Council	• Biodiversity • Pest plant/animal
This project extends previous work by Upper Wakefield Landcare (UWL) in restoring and stabilising the river bed and banks of the Wakefield River. Weedy trees and plants will be removed from this prescribed area by the UWL volunteers with professional tree removal experts. There will be a specific emphasis on planting to stabilise the eroded riverbanks.				

Education Department - Clare High School *Connecting with Country & Community - Clare High School Bushfood and sensory project*	$8,555	School	Clare and Gilbert Valleys Council	• Biodiversity • Pest plant/animal
The project aims to provide environmental, cultural and sustainability education to the Clare High School community and wider. It will consist of Ngadjuri Nation Engagement; plantings within the school grounds; a field trip to a working biodynamic and organic farm; and educating students and the wider community in sustainable agriculture by the sharing of agrifood farming systems and practices of First Nations people.				
Clare Valley Wine & Grape Association Incorporated *A training and engagement program to support the adoption of Sustainable Winegrowing Australia by Clare Valley grape growers*	$9,995	Wine & Grape Association	Clare & Gilbert Valleys Council	• Sustainable Agriculture
Delivery of a *training and engagement program to* respond to challenges of a changing climate through improving resilience of the local landscape. Sustainable environmental management of vineyards is a focus of the new national sustainability program Sustainable Winegrowing Australia (SWA).				
Mid North High Rainfall Zone *MNHRZ Pasture Evaluation Trials - Giles Corner and Farrell Flat*	$10,000	Ag Bureau	Clare & Gilbert Valleys Council	• Communities • Sustainable Agriculture
The Mid North High Rainfall (MNHRZ) Inc. is a not-for-profit, membership based group focused on delivering research and development to primary producers located throughout the high rainfall zone of South Australia's Mid North. Pasture trials and MNHRZ Winter Walks & Spring Field Days.				
Nukunu Wapma Thura Aboriginal Corporation *Karku Project: Rehabilitation of a Nukunu ochre quarry and riparian corridor*	$9,253	First Nations	District Council of Mt Remarkable	• Communities • Sustainable Agriculture
This grant will support the rehabilitation of a culturally significant ochre (Karku) site for Nukunu, to preserve cultural heritage and enable the continued practice of Aboriginal culture. It will involve weed control, riparian rehabilitation and the preservation of an important First Nations cultural heritage site.				

Bowman Park Management Committee *Weed eradication and riparian restoration at Bowman Park*	$10,000	Community Group	Port Pirie Regional Council	• Pest plant/animal
The project objective is Restoration of vegetation in riparian zones through the removal of pest plants along 40 ha Bowman Park creek, as per Broughton River Catchment Action Plan. Target species include pepper trees, horehound, box thorns, brier rose and olive trees. The Bowman Park Management Committee is a group of 10-15 volunteers from Crystal Brook and surrounds who value the park as a unique local asset and help with maintenance and improvement by donating their time and energy. Natural regeneration assisted with extensive Volunteer follow-up weed removal over the ensuing three years.
