

# Granite Island Recreation Park

# Treasure Hunt!

Look and listen as you visit the Island.....

## Granite Island is a special place for Ramindjeri and Ngarrindjeri people

- Granite Island is home to many species of wildlife. You can sometimes see them or hear them. How many different species of wildlife can you find?
- Encounter Marine Park surrounds Granite Island. Make sure you look out for southern right whales. **What else might you find in Encounter Marine Park?**

© State Library of South Australia, B63623

The Island used to have a lighthouse and harbourmaster's residence.

When you walk around the Island, guess where the lighthouse once stood

## I can find.....

	<b>The sound of the sea hitting the rocks</b>		 <b>Evidence of animals</b>
<b>The windiest spot on the island</b>		<b>Something that has been eroded</b>	
<b>A plant affected by salt spray</b>	<b>Two things that are orange</b>		<b>Something that doesn't belong</b>
 <b>Flower</b>		<b>Something that smells sweet</b>	<b>Something prickly or rough</b>

Reflection: what was your favourite spot on the Island?

The National Parks and Wildlife Service would like to acknowledge the Ramindjeri and Ngarrindjeri people, the Traditional Owners of the land and surrounding waters.
